

Minfang Zhang is a senior researcher at the National Institute of Advanced Industrial Science and Technology (AIST) in Tsukuba, Japan. She obtained her Ph.D. in materials science from Mie University in 2002. Concurrently, she joined a JST National Project led by Prof. Iijima and Dr. Yudasaka, focusing on the synthesis and application of carbon nanotubes and nanohorns for drug delivery. Since 2008, she has continued her research at AIST, with a specific focus on investigating the toxicity and

biodegradability of nanocarbon materials.
